

13th January 2022

Dear Parents/carers,

Further to yesterday's letter we have had a few further cases in Treen & Perran class, as a result public health have provided us with the following letter to send out to all children in these classes.

We wish to inform you there has been a further number of confirmed cases of COVID-19 within the school. The school remains open. If your child remains well, they can continue to attend school as normal. We will keep this under review.

Students and staff who have tested positive are isolating. The children/staff who are identified as contacts of the confirmed cases will have guidance from NHS Test and Trace. Control measures are in place within the school and further control measures have been introduced for areas within the school where we are aware of confirmed cases.

We have identified an increased number of cases in Nursery and Reception. Therefore, Public Health has recommended that pupils in Treen and Perran should get a single PCR test even if they are well. The reason for this recommendation is because the general age of these classes are 5 years or under and therefore daily LFD testing for a period of time is not recommended for this age group. By carrying out a single PCR test we aim to identify new COVID-19 cases earlier and reduce transmission in school. If they do not have COVID-19 symptoms they can continue to come to school. If they test positive on PCR test, they should immediately self-isolate for 10 days.

***If at any point they develop new COVID-19 symptoms they should self-isolate and take a PCR test.***

**If your child develops symptoms of COVID-19 or tests positive for COVID-19**

If your child develops symptoms of coronavirus (COVID-19), they should get a PCR test (<https://www.gov.uk/get-coronavirus-test> or call 119) and remain at home at least until the result is known and they are fever free (without medication) for at least 24 hours.

- If negative, the child can end self-isolation and return to school/nursery/college once well;
- If positive, the child should isolate as a positive case (in this instance, as the child is 5 years or under, isolation is the full 10 days)

**Note:** Lingering coughs and changes to smell/taste are *not* a sign of ongoing infectiousness, so children can return to school if they have ended their self-isolation period.

You can seek advice on COVID-19 symptoms from the [nhs.uk website](https://www.nhs.uk). If you are concerned about your child's symptoms, or they are worsening you can seek advice from NHS 111 at <https://111.nhs.uk/> or by phoning 111.

## **Instructions for people who live in the same household as someone who has tested positive for COVID-19 or is symptomatic and awaiting a test result**

NHS Test and Trace will contact you to check whether you are legally required to self-isolate. If you are not legally required to self-isolate, you will be provided with advice on testing, **advised to take extra caution**, and given guidance on preventing the spread of COVID-19.

Those who are [clinically extremely vulnerable](#) should be supported to minimise their contact with other people in the household during this period, regardless of whether others have symptoms or not.

### **You are *not* required to self-isolate [if any of the following apply](#):**

- You are fully vaccinated
- You are below the age of 18 years 6 months
- You have taken part in or are currently part of an approved COVID-19 vaccine trial
- You are not able to get vaccinated for medical reasons

Fully vaccinated means that you have been vaccinated with an MHRA approved COVID-19 vaccine in the UK, and at least 14 days have passed since you received the recommended doses of that vaccine (note this is currently under review and may be updated to include a booster dose in due course).

In line with national guidance for households with Covid-19 infection, household and other close contacts of someone who has tested positive for COVID-19 should undertake **daily LFD testing for a period of 7 days** or for 10 days from their last contact with the positive case (whichever is first). This is recommended for all close contacts aged 5 and over who are not required to isolate.

### **You are required to self-isolate if you're aged over 18 years and 6 months and [if any of the following apply](#):**

- You have received only one dose of the COVID-19 vaccine
- You have not received any dose of the COVID-19 vaccination
- You are not otherwise exempt

Household members who need to self-isolate as close contacts should not go to work, school or public areas, and exercise should be taken within the home. You should ask friends or family if you require help with buying groceries, other shopping or picking up medication, or walking a dog. Alternatively, you can order your shopping online and medication by phone or online. Please read [the stay at home guidance](#) which provides information on this.

Household members staying at home for 10 days will greatly reduce the overall amount of infection the household could pass on to others in the community.

You could be fined if you do not self-isolate following a notification by NHS Test and Trace. You may be entitled to a one-off payment of £500 through the [NHS Test and Trace Support Payment scheme](#) if you are required to stay at home and self-isolate, or you are the parent or guardian of a child who has been told to self-isolate.

## **How to reduce spread of COVID-19 as a household contact who is not required to self-isolate**

Even if you are vaccinated, you can still be infected with COVID-19 and pass it on to others. If you are identified as a contact of someone with COVID-19 but you are not required to self-isolate, you can help protect others by following the [guidance on how to stay safe and help prevent the spread](#).

To reduce the spread of COVID-19 in your community:

- Test daily using LFDs (if over the age of 5 years)

- Limit close contact with other people outside your household, especially in enclosed spaces (when not in school/nursery/college)
- Wear a face covering for those aged 11 and over in crowded, enclosed or poorly ventilated spaces and when you are in close contact with other people
- Limit contact with anyone who is at higher risk of severe illness if infected with Covid-19
- Follow the guidance on [how to stay safe and help prevent the spread - GOV.UK \(www.gov.uk\)](https://www.gov.uk/guidance/how-to-stay-safe-and-help-prevent-the-spread-of-covid-19)

**You should follow this advice for at least 10 days.**

If you are a health or social care worker or student undertaking a work placement who has been identified as a household contact and are exempt from self-isolation, there is [additional guidance](#) available that you should follow to reduce the risk of spread of COVID-19 in these settings.

If you develop symptoms at any time, even if these are mild, self-isolate immediately, [arrange to have a COVID-19 PCR test](#) and follow the [guidance for people with COVID-19 symptoms](#).

**For most people, coronavirus (COVID-19) will be a mild illness.**

**How to stop coronavirus (COVID-19) spreading**

There are things you can do to help reduce the risk of you and anyone you live with getting ill with coronavirus (COVID-19):

- Get vaccinated – everyone aged 12 and over can book COVID-19 vaccination appointments now
- Wash your hands with soap and water or use hand sanitiser regularly throughout the day
- Cover your mouth and nose with a tissue or your sleeve (not your hands) when you cough or sneeze
- Put used tissues in the bin immediately and wash your hands afterwards
- Meet people outside and avoid crowded areas
- Open doors and windows to let in fresh air if meeting people inside
- Wear a face covering if aged 11 and over when it's hard to stay away from other people – particularly indoors or in crowded places
- Participate in twice weekly LFD testing following national guidelines (recommended for 11 years and over). We encourage you to log your results here: <https://www.gov.uk/log-test-site-covid19-results>

**Further Information**

Further information is available at <https://www.nhs.uk/conditions/coronavirus-covid-19/>

Thank you for your support,

Leisa Farrar
