

Year 2 Home Learning Week Beginning 29/6/2020

English

1. Reading comprehension: lifeboats
2. Grammar: question sentences
3. Spelling: ful suffixes wordsearch

Project

Find out about the history of lifeboats.

Research information on the RNLI. Write questions that you would like to find out the answers to, for example: What equipment do they use and why? How has this changed over the years? When was the different equipment they use invented? Who makes up the crew of the lifeboat?

Using a map of Great Britain, can you research where the lifeboat stations are located and plot them on the map? How many do we have in Cornwall?

Present your information in a clear and interesting way of your choice. This could be a fact file, a book, an information poster or even a powerpoint.

Useful websites to help with your research: RNLI, Maritime museum, Penlee Lifeboat Station

Maths: Division.

Division can be worked out by sharing or grouping equally. We can use pictures, arrays or number lines to work them out. Unlike multiplication you start the number sentence with the largest number and share/ group by the number you are dividing by. Your answer will be smaller than the number you started with. The working out will, however, be the same. Please watch the videos on youtube to show you how to work these out.

Please email your teacher any learning you have done:
